DETAILED ACTION

Continued Examination Under 37 CFR 1.114

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on September 17, 2010 has been entered.

Allowable Subject Matter

Claims 1 and 5-16 are allowed.

The following is an examiner's statement of reasons for allowance: The prior art fails to teach or suggest, **“wherein said optical interference structure is configured to enhance light transmission through said cathode at said emission wavelength and comprises an optical interference layer disposed between first and third layers of different refractive indices such that reflections from front and back surfaces of said optical interference layer interfere to enhance light transmission through said cathode at said emission wavelength, said first layer comprising the electron injecting layer for injecting electrons into said light emitting layer, said third layer comprising the electrically conducting layer, and said optical interference layer having an optical thickness of between a third of said emission wavelength and a fifth of said emission wavelength,”** in conjunction with the remaining limitations of claim 1.

The prior art further fails to teach or suggest, **“said coupling layer and said substantially electrically conductive layer having different refractive indices such that**

Art Unit: 2879

reflections from front and back surfaces of said spacer layer interfere to enhance light transmission through said cathode at said emission wavelength and wherein said spacer layer has a thickness of approximately an odd integral number of quarter wavelengths at said peak electroluminescence wavelength such that transmission through said first electrode layer at said peak electroluminescence wavelength is substantially maximized," in conjunction with the remaining limitations of claim 13.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
